DJ TREMAIN
Customer Testimonial

We would like to thank David and Tom of DJ Tremain for their continued support of Masons Kings.

We have been working with David and Tom since they bought their first Quality Assured John Deere 6930 tractor in January 2014. Masons Kings Quality Assured programme covers a wide range of products including tractors, combines, gators and more. This is a warranty scheme which gives the customer a fixed cost and peace of mind.

Since buying their 6930, they have bought two more quality assured tractors and has recently bought a new John Deere 6155R from one of our Sales Team, Stuart Vanstone.

Stuart is our Used Equipment Manager and has built up a good relationship with David and his family over the last seven years.

David has been very pleased with our service support since working with us and has praised the knowledge and friendliness of the Agricultural Sales team, Technicians and Parts team at Masons Kings.

"Stuart is a very reasonable, trustworthy salesman who I have been working with for the last seven years. He'll go out of his way to provide a high-quality level of customer service and is very easy to talk to."

We look forward to a continuous working relationship with the DJ Tremain family in the future.

If you would like to find out more about our Quality Assured scheme or Used equipment, please look at our website or contact **Stuart on Stuart.Vanstone@MasonsKings.co.uk or 07711440783.**

TWO NEW MANUFACTURERS

HERRON ENGINEERING

Masons Kings are now stocking SIP Agriculture grassland equipment and Herron Engineering Slurry tankers!

SIP's vision is to produce quality machines for mowing and hay harvesting, to satisfy the most demanding users, to make them easy to use and to minimise work time, with a unique, durable construction and usability to ensure perfect operation and maximum performance to ensure superior feed. SIP machinery stands out because of its simplicity of use and unique robust construction, which offers excellent durability.

Herron Engineering are widely recognised as the market leaders when it comes to slurry tankers and slurry spreading equipment. They offer an extensive range of Recessed Vacuum Tankers ranging from 1750 gallons to 4000 gallons. All their tankers are manufactured with high quality materials and components, are technologically advanced and comprise key specifications that meet the most demanding needs of the agricultural market today.

If you'd like to enquire about our SIP or Herron products, then please give your local rep a call!

THE BEST JUST GOT BETTER

HARVESTLAB

The **HarvestLab 3000** hardware reflects state-of-the-art technology and builds on millions of hours of in-field experience. It provides you with not just one random sample value, but real time statistically solid on-the-go samples.

Errors that usually occur during manual sample collection, like oxygen or heat exposure until the sample arrives at the next laboratory are completely eliminated. Last but not least, all data is displayed and site-specifically documented in real time.

NO MORE ERRORS

FARM MAPPING

Our professional farm mapping service allows you to use AutoTrac guidance systems to easily master straight and curved tracks, making it easier to work while giving you a true field size – reducing your input costs

DATA MANAGEMENT SUPPORT

Are you recording your field operations on your in-cab display?

Did you know your in-cab display can record operation data such as rates, quantity of product applied and start/finish times? This data can then be viewed through the free MyJD online platform.

If you are not already recording this data, our FarmSight department can help you record and access this useful information.

GEN 4 UPDATES

John Deere recently released version 20-3 software for generation 4 displays.

New features include

- Multiple Implement support
- Auto path as applied guidance lines
- New work planner tool

The new work planner tool allows users to plan field work using the MyJD Operation Centre which can be exported wirelessly to the relevant tractor.

VARIABLE RATE NITROGEN (VRN APPLICATION)

Hummingbird Technologies

Masons Kings

Targeted Nitrogen Application

Level up crop canopy

Reduce GHG + environmental impact

Minimise product spend, maximise yield

PURPOSE

This map identifies areas that need more or less fertiliser in the crop.

BENEFITS & VALUE

Use this tool to vary the amount of nitrogen rates in accordance with your crop requirement to avoid over / under supplying Nitrogen and precision target specific areas, optimising your return on investment. Whether your decision is based on plant numbers, tiller numbers, canopy assessment, plant health, you now have scientific data to accurately dictate what specific areas receive, in terms of nitrogen.

HOW IT WORKS

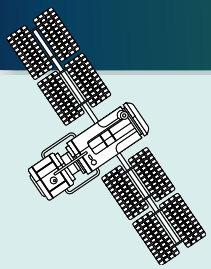

The application plan is constructed on NDVI measurements across the whole field. Apply higher volumes of Nitrogen to areas with lower NDVI or inverse the plan to apply more to higher NDVI areas according to which split you are making.

NITROGEN PLAN PREVIEW

Avoid over supplying nitrogen, reducing waste and negative environmental impact whilst maximising yield potentials from precision targeting inputs

Tailor your application according to the crop biomass and product label recommendations

Powerful, robust 140-bar pressure washer for exceptional comfort. Hose reel featuring a hose guide, folding crank and 12 m steel-reinforced high-pressure hose, high-pressure pump made from brass, pressure / flow control using a pressure gauge, integrated tank with dosing control for cleaning agent, adjustable fan jet nozzle, rotary nozzle made from wear-resistant ceramic, anti-drill quick-release coupling on the lance, storage compartment for the nozzle.

JOHN DEERE X100 SERIES

Flexible and dependable

With six models and a wide range of features and options to choose from, the X100 Series has something for everyone. Designed for lawns of 3,000 to 6,000 m², these robust lawn tractors are engineered for years of trouble-free service and combine superb cut quality with outstanding ease of use.

Intuitive Transmission control

Side-by-Side Pedals allow you to control direction and speed without raising a foot. The automotive-type accelerator control ensures easy operation, while the cruise control (standard on the X127 and X167) makes the ride easier.

Easy Controls

To adjust the height of cut, simply move the lever.

Side Discharge Edge Decks

- Sturdy, efficient mower decks come standard on the X107, X127 and X167 and have a wash port for quick, painless cleaning. Side discharge recycles grass clippings onto your lawn as a nutrient-rich natural fertiliser.

High Capacity Collector

A capacity of 300 litres means fewer stops and faster work. Standard on the X117R, X147R and X167R

NEW MOWER MAKES ITS I

Masons Kings sold the first 2750E hybrid electric triplex mower in the area to The Point at Polzeath resort in north Cornwall, with the golf course's head greenkeeper Tom Collings calling it "… just the mower I wanted".

The 18 hole golf course sits just above the Camel Estuary with stunning views out over Hayle Bay and Pentire Point, and was England Golf's GolfMark 'Club of the Year' winner in 2017. The club was bought out of liquidation in 2012 by husband and wife team Jeremy Davies and his wife Eva, who have since made a significant investment in every aspect of the business.

This has included the course maintenance equipment fleet, to get the course back into better shape and improve standards across the board. As a result, the greens are now considered to be among the best in the county and the presentation of the course is first class. Most holes have seen significant changes, with improvements to the fairway definition, bunkers, tees and greens, and a new 160-yard par 3 7th hole being developed.

The club has steadily replaced its previous, ageing machinery fleet over the last five years and invested in new John Deere machines from the Masons Kings outlet at St Columb. In addition to the 2750E, a new pedestrian Aercore 800 aerator was delivered to the club following an end of year demonstration, "…just in time for Christmas!" says dealer sales consultant David Barnes.

Summer 2020 also saw the arrival of a 7700A PrecisionCut fairway mower, following two 220SL walk-behind greens mowers in 2019 and a 9009A TerrainCut rotary rough mower, 4066R compact tractor, ProGator utility vehicle and 8800A TerrainCut mower spread over the previous three years.

"We are continuously investing in John Deere's latest golf equipment and precision technology as we aim to be the leading supplier of machinery and product support for golf courses across the south-west of England," adds David Barnes. "The Point at Polzeath was the first club in our area to buy the new 2750E, and we are confident it will

MARK

and we are confident it will do a great job across the course for Tom and his team."

Tom Collings came to The Point from nearby Trevose in 2009 and has seen the change of ownership breathe new life into what at that time had been a struggling business. "The owners believe if you're not moving forward, you're going backwards, so they've continued investing as far as possible, even during the pandemic," he says.

"We bought the 8800A outright back in 2016 as part of the initial machinery investment, but since then we've taken all the mowing equipment on a five-year finance lease arrangement with John Deere Financial. We've continued to buy the tractors, utility vehicles and hand mowers, as these tend to last a lot longer if you look after them well, although it always depends on the owners' preference each time.

"I also have a good relationship with David Barnes and parts manager Rob Blundell at Masons Kings," adds Tom. "They have always been very helpful and accommodating, even before we started buying more John Deere equipment, and have helped me out many times by supplying parts for our older kit, for example – so in a way it's been our turn to repay the favour with these latest purchases.

"I first saw the 2750E on social media after it was launched at BTME, and then John Deere invited me to visit Wentworth. Territory manager Nick Ashman talked about the changes the company had made to the mower and the benefits it could offer, so I was keen to have a look at it working on our course.

"Masons Kings arranged a demonstration here and after cutting the first green I was completely sold, I just found it a totally different experience to any previous mower. Given how it handled and coped so easily with the conditions around the course, the decision to buy one was a no-brainer – it was just the mower I wanted."

COVID *UPDATE*

Our depots are open and we will be pleased to welcome you inside whilst following our current guidance and safety measures:

ENTRANCES
at this time we will only be able to welcome customers through our main entrances.

FACE MASKS / COVERINGS
must be worn by customers and staff.

SOCIAL DISTANCING
please make sure you stay 2 metres apart from other customers and our staff.

SAFETY ZONE
all our counters have a marked 2 metre safety zone as well as protective screens.

HYGIENE
please use our dedicated hand sanitiser station when entering our buildings.

GROUP VISITS
we are asking that no more than 2 people per household or group enter our depots at one time, to keep shopping with us an enjoyable experience.

QUEUING AT BUSY TIMES
for safety we are limiting the total number of people into our buildings at one time. 6 people will be welcome into our Chudleigh and St Columb depots and 10 into our Exebridge depot. Our staff will let you know if we need you to queue outside until the customers inside are leaving the building.

CLEANING
all our depots are professionally cleaned and our teams are regularly cleaning too. Showroom machinery will be cleaned regularly and after every consultation.

PAYMENTS
can now be made in the depot. We take contactless payment and for larger payments we will be cleaning our chip and pin machines before every use.

Thank You

for supporting Masons Kings

We hope to be back to normality soon!

WEB SHOP

www.masonskings.co.uk

This year we have been working hard on the development of a new web shop which we can finally share with you!

We've given our website a completely new look and have now added a shopping experience!

Shop over 1000 items online such as:

- Accessories
- Chainsaws
- Forestry Equipment
- Groundscare Equipment
- Power Tools
- Ride on mowers
- Spare Parts

and much more!
