# HE-VA Grass Rejuvenator

A grassland improvement machine which consists of an aggressive Shattaboard with slicing plates, 2 rows of heavy duty harrow tines, an Air 8 (2.9m, 4.5m models) or an Air 16 grass seeder (6.3m, 8.2m models) and a Prisma roller. The slicing plates and harrow tines break up and level the soil surface in front of the grass seed outlets and the soil is then firmed behind by the Prisma roller. The Grass Rejuvenator comes in four working widths, 2.9m, 4.5m, 6.3m and 8.2m.

The aggressive slicing plates and harrow action make the Rejuvenator ideal for use in badly poached fields which require restoration. It can also be used – minus the seeder – for harrowing grassland to remove trash and stimulate grass growth, and for molehill levelling.

Furthermore the action of the heavy 550/600mm diameter Prisma roller cracks and breaks clods produced by the front equipment to create a fine tilth for grass seed to germinate in. As a result the machine is ideal for both grassland rejuvenation and reseeding cultivated land.

- 1 Aggressive shattaboard with slicing plates.
- 2 2 rows of heavy duty tines.
- 3 550/600mm Prisma roller.
- 4 Jack stand with turn-buckle.
- 5 Optional Air 8 or Air 16 seeder - 8/16 outlets, 8/16 internal meeting wheels, 180/460L hopper capacity, variable seed-rate, twin electric fans (Air 8) or hydraulic fan (Air 16), and or radar forward speed related metering.

## Grass Rejuvenator Specifications

Model No.	Description	Type	Weight
1063021-57	2.9m Mounted Rejuvenator	550/600mm Prisma Roller	1440kg
1063026-57	2.9m Trailed Rejuvenator	550/600mm Prisma Roller	1920kg
1063029-57	4.5m Trailed Rejuvenator	550/600mm Prisma Roller	3140kg
1063033-57	6.3m Trailed Rejuvenator	550/600mm Prisma Roller	3940kg
1063036-57	8.2m Trailed Rejuvenator	550/600mm Prisma Roller	5290kg
	Mounted - seeder mount kit		
	Trailed- seeder mount kit
