

INTEGRATED TECHNOLOGIES

# Providing Premium Support For Premium Products

## ABOUT US

# Who we are

We are experts within our field with over 30 years industry experience. Our team are there to provide you with professional and expert advice.

As a family run company, we pride ourselves on our strong values and commitment to building a relationship with our new and returning customers.

Our motto is 'Providing Premium Support For Premium Products', so you can feel fully assured that you will be receiving the best in machinery, service and parts.

If you have a question or would like advice, then please contact your dedicated sales rep for more information.

TOM JOSLIN

## Your dedicated Integrating Technologies Data Consultant

Tom joined our Masons Kings team in 2022 as our Integrating Technologies Data Consultant. Bringing with him a passion for good clean field data to help make the customer or contractors life easier, as well as keeping them compliant.

Technology is at the forefront of Masons Kings and Tom is always happy to help with any questions.

# Integrated Technology Features

## FIELD MAPPING

Fields are mapped using a John Deere Gator, which when loaded into your myjd account.

Complete with your SBI / RPA numbers, allows the user easy data access during those last minute farm inspections.

## REDUCING INPUT COSTS

Recording your field work, including products and the areas worked on.

Allowing you to make calculated decisions on product quantity going forward and saving you money in the future.

## PARTNERSHIP FOR THE FUTURE

Whether you are a contractor and want to give your customers access to their data or a customer who wants to share their data with their agronomists, we can help you set this up.

## TOOLS TO HELP

Remote Display Access: Saving you time and money.

JD Section Control: Automatically turns individual implement sections on and off.

JD AutoTrac Steering: Reduces overlap and gaps, which reduces costs up to 8%, saving you money in the long run.

## DATA CLEANSING

Data cleansing allows you to make informed decisions for the future.

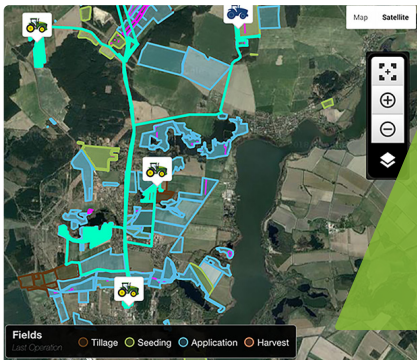

With the ability to boundary and name your fields, as well as mapping interior boundaries and markers to make clean and complete data.

## MACHINE UTILISATION

With the cost of fuel fluctuating, getting the most out of your machine has never been more important, looking at idle time, engine load and much more.

Our reports provide you with the data on how to do this.

## FARM MAPPING SERVICE

We will come out and map your fields, load into your myjd account and advise you on the best practice for data collection and analysis.
