

# **SCRUBMASTER** ROTARY **SLASHER**

**WESSEX ARE STILL SUPPLYING PARTS FOR SCRUBMASTERS SOLD IN THE 1960s!**

In short, the Wessex **SCRUBMASTER ROTARY SLASHER** is unstoppable! Built to cope with the most arduous applications, this robust machine is ideal for controlling areas of dense vegetation and heavy scrubland ie, forestry plantations, firebreaks, rides, and gorse moorlands etc.

The massive blades will deliver over 3,000 1 ton impact cuts per minute making light work of brambles, gorse, heather and trees / saplings up to 100mm diameter. The chain cutters are recommended in areas where there are likely to be hidden rocks, boulders and tree stumps etc. The chains will thoroughly lacerate cut material, accelerating the breakdown and rotting process.

## **SPECIFICATIONS**

	<b>SM-66</b>
Working width	1.7m
Overall width	1.8m
Blade tip speed	70.7 m/s
Weight (blades & chains)	516kg blades / 468kg chains
Minimum power required	45hp

## **KEY FEATURES & BENEFITS**

- ✓ **HEAVY-DUTY CONSTRUCTION** – Durability
- ✓ **MASSIVE GEARBOX** – Maximum drive transmission
- ✓ **FRICITION PLATE CLUTCH** – Overload protection
- ✓ **BLADE OR CHAIN CUTTERS ARE INTER-CHANGEABLE** – Varying applications
- ✓ **REPLACEABLE SKID SHOES** – Ease of maintenance
